PROFESSIONAL SERIES COMBO UNITS

The Professional Series Combo Unit combines a rugged Eastey L-sealer and shrink tunnel on a common frame with one power source. This allows for quick setup, perfect alignment and consistent product sealing. A common base with casters makes this a very portable system for transportation within the plant.

Proven reliable over and over again, these top-of-the-line Eastey L-Sealer Combo Units provide you with all the quality features found in much higher priced machines. They are designed and built to give you all the performance features needed for positive sealing a wide variety of films including polyolefin and PVC.

FEATURES AND BENEFITS

- Designed to seal most polyolefin, polyethylene, and PVC shrink films.
- All-welded main frame from ¼" cold rolled steel.
- Live roller or stainless-steel mesh belt conveyors.
- Adjustable digital solid state temperature control for a variety of films.
- Four-directional air flow provides positive shrinking.
- Variable air flow and air velocity for a variety of products and applications.
- Available with hot wire or hot knife seal systems.
- Takeaway conveyor can be raised or lowered to center-seal product.
- Adjustable pin perforator provides air evacuation.
- Heavy duty casters for transportation within plant.
- Easy to use design requires minimal training and maintenance.
